Recommendation Letter for Mr. Ernesto Bocini

This letter is in support Ernesto Bocini a student in Communication Systems at EPFL.

During the academic year 2022/2023, Mr. Bocini took the mandatory class "Distributed Information Systems" in our laboratory, where he was among the top 5 students of the class (173 students in total). His motivation, his willingness to work and sense of initiative during the class were constantly excellent. Furthermore, he proved to have a great intellectual curiosity and shows a very kind nature with the other students and the teaching assistants. Mr. Bocini proved to be an excellent student and he has acquired a strong background in distributed information systems, in particular mastering the most recent advances in fundamental aspects of distributed information systems, including information retrieval, data mining and knowledge graphs. This background will be a strong foundation for any project in information systems.

For all these reasons, it is a pleasure to recommend Mr. Bocini.

Sincerely,

Karl Aberer
